

# CARE INSTRUCTIONS

## Place it. Stick it. Peel it.

Your Peelable Poster can be applied to a wide range of surfaces. Pick a smooth, dry and clean surface –the best places are on any wall, door or window that is flat and clean. Your Peelable Poster may have limited adhesion to pebbly, textured or porous surfaces (i.e. brick; cement walls or breeze block). As with any poster do not put it above fireplaces; beds or cots. Always test your surface to ensure that it will accept a Peelable Poster without causing damage. To do this peel a corner of the Peelable Poster and apply to an out of sight part of the surface to check adhesion and ensure no signs of marking. **PLEASE NOTE:** If applying to a painted surface it MUST BE primed or have an undercoat applied, otherwise the Peelable Poster may cause paint to come off. DO NOT APPLY the Peelable Poster to painted walls which have not been primed/undercoated; or to damaged surfaces e.g. cracked/flaky paint or plaster or to damaged or torn wall paper.

1. Peel the backing sheet from the top to half way down.
2. Place poster onto the surface and gently smooth to eliminate any air bubbles.
3. With the poster in place, peel the remainder of the backing sheet and smooth downwards to ensure a firm application. Push out any air bubbles to the side or bottom of the poster. Retain the backing sheet if you wish to remove and store you Peelable Poster.
4. If you want to remove your poster, carefully peel off and re-attach it to the backing sheet. Re-apply the Peelable Poster to the waxed/glossy surface. Once used and removed your Peelable Poster can be used again if the backing paper is re-applied and the poster and backing paper is kept clean, dirt free and dry.
